San Gabriel, California

List No. 16

---

In making a list such as this we can show only a fraction of our stock. Those who visit the nursery can choose from numerous varieties not listed as well as from those in the catalogue. All plants sold are in vigorous health and are bred from the finest parents for vigor, color, size, texture and season of bloom. We have exercised the greatest care in the selection and breeding of our plants and our purpose is always for the production of top quality stock.

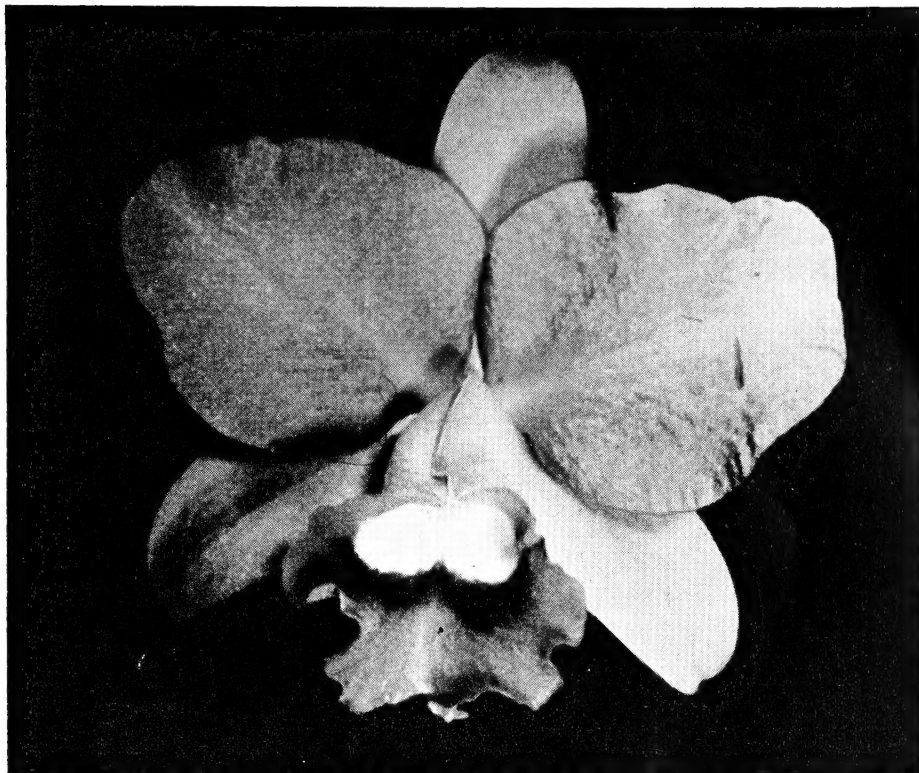

We are fully conscious of the constant improvement made by leading hybridists in the important types of commercial orchids. Our efforts are to maintain the front rank position of our nursery for top quality plants and our crosses look well into the future, since we realize that the period ahead will demand standards higher than those of the present day. It will be noted that our orchids capture top honors wherever shown.

We are pleased to have those interested in orchids and their culture visit our nursery. Our staff will attempt to assist orchid enthusiasts in their problems. Correspondence to this end is invited.

We have a separate catalogue on cymbidiums. Our collection of cymbidiums is one of the finest in the country and we offer many promising seedlings bred from exhibition type parents. We would be happy to mail you this catalogue if you are interested.

<i>No.</i>	<i>Parentage and Description</i>	<i>Pot Size</i>	<i>Price per Plant</i>
S-2	C. JEAN BARROW X C. SUZANNE HYE ALBA This cross should be a very worthwhile winter and spring white. C. Suzanne Hye alba has been used with success in the making of such fine hybrids as C. Bow Bells, C. Edithiae and many others.	2" 2½"	3.00 4.00
S-3	C. VILLE DE LIEGE ALBA X C. LUEGEAE ALBA An extremely free flowering and easily grown white with purple lip is expected from this cross. The season should be summer and fall.	2" 2½"	2.50 4.00
S-4	C. MT. ROYAL X C. FABIANID A large flat flower of fine shape, color and substance we are sure will be the result of this cross. The Mt. Royal used has consistently proven to impart fine shape to its hybrids. The growth on these seedlings is excellent.	2" 2½" 3"	3.00 4.00 6.00
S-10	LC. DOROTHY FRIED X LC. CONQUISTADOR Two famous parents were used to make this hybrid. Practically all plants of Lc. Dorothy Fried, a hybrid of Lc. Princess Margaret, that have flowered have been outstanding. Many prize winning plants have come from the Lc. Conquistador also. The season will be summer and fall while the flowers will be large, dark and of very good shape.	2" 2½"	3.00 4.00
S-14	C. ALTADENA X LC. CUESTA A free flowering, easily grown, quality hybrid was the object in making this cross. Lc. Cuesta ranks among the finest hybrids bred to date and we are confident of its ability to breed quality.	2" 2½"	3.00 4.00
S-15	C. VARUNA X LC. GITCHE MANITO This is a cross that we are counting on to be most worthwhile. Both parents are large and dark. Season will be variable though primarily summer and fall.	2" 2½"	3.00 4.00
S-18	C. CONCINNITY X C. WHITE CLOUD, very large This cross should live up to our expectations for an above average pure white for the important months of late summer through fall. We have observed both parents for a number of years. They have always borne flowers of superior quality.	2" 2½"	3.00 4.00
S-27	C. MOSSIAE WAGENERI A pure white, free flowering cattleya to flower for June. This is the fourth batch of seedlings raised from crossing two selected C. Mossiae Wageneri's. C. Mossiae Wageneri to our mind is one of the most profitable cut flower cattleyas. We do not have a large block of this cross to offer.	2" 2½"	3.00 4.00
S-35	C. BRUSSELS ALBA X C. VILLE DE LIEGE ALBA This is another white with purple lip cross bred to fill in for the early fall season. Both parents are famous for being vigorous and bearing an abundance of large good quality flowers.	2"	3.00
S-41	C. ACHINE ALBA X C. VILLE DE LIEGE ALBA Should be an extremely strong growing white with purple lip for the fall season. 3" community pots, 10 to 15 plants per pot.	3" Pots	Com. .75

**C. PORCIA, CANNIZARO VAR., A.M., R.H.S.**  
*(C. Armstrongiae x C. Bowringiana)*

One of the finest of the cluster type cattleyas. It bears around 12 flowers to a spray. We offer seedlings with Porcia as a parent.

- |      |  |    |      |
|------|--|----|------|
| S-42 | C. PORCIA CANNIZARO VAR. A. M., R.H.S. X<br>LC. CUESTA, very dark. | 2" | 3.00 |
|------|--|----|------|

We regret that we have but a small block of this cross to offer. The C. Porcia to our minds is one of the best of the small cluster type, while the Lc. Cuesta is very large and dark reddish lavender. Our hopes here are for a flower intermediate between the two in size with the desirable qualities of both.

- |      |                                       |     |      |
|------|---------------------------------------|-----|------|
| S-45 | LC. PRIAM X L. TENEBROSA, YELLOW VAR. | 2"  | 3.00 |
|      |                                       | 2½" | 4.00 |

The Lc. Priam has the snug shape of its C. Harrisoniana parent. Its sepals and petals are a clear pinkish rose color while the lip is a beautiful rich yellow. This plant has been a favorite at our nursery for many years. The L. tenebrosa had yellow sepals and petals with violet purple markings on the lip. It can be expected that the results here will be a flower intermediate in size between the two parents, while the color will range from pinkish lavender, with some cream suffusion, to some yellows. We plan on raising a block of this cross to maturity.

- |      |   |     |      |
|------|---|-----|------|
| S-48 | C. HAROLD ALBA, PAUWELS TYPE X LC. WINEMA | 2"  | 3.00 |
|      |   | 2½" | 4.50 |

C. Harold alba, Pauwels type, has a splendid record over the years for breeding fine hybrids. Lc. Winema is a cross from which quite a number of splendid white with solid purple lip plants have flowered. The season will probably be early summer through fall which is a time when good whites are in demand.

No.	Parentage and Description	Pot Size	Price per Plant
S-50	C. MAGGIE RAPHAEL (C. Trianae var. Imperator x C. Dowiana) Flowers will have very good color with especially dark lips which is characteristic of C. Trianae Imperator hybrids. Season will be fall and early winter. For those who like the "red" types, we suggest this one.	2"	3.00
S-51	C. BELGICA (C. Remy Cholet var. Brilliant x C. Enid, very fine) The C. Remy Cholet used has unusually brilliant coloring and can be depended on to show up in a great many of the seedlings. The C. Enid is the finest from a large block of this hybrid. The season will be throughout the winter. 3" community pots, 15 to 20 plants per pot.	3" Com. Pots	.50
S-54	C. BRUSSELS ALBA X C. LABIATA VAR. GILMOURIAE The C. labiata used here is the most famous, and considered to be the best, of the white with purple lip labiatas. The C. Brussels alba should assist in every way to make this an excellent cross. The seedlings have a compact, sturdy growth habit. We have considerable confidence in this cross. A promising white with purple lip.	1½" 2"	1.75 3.00
S-56	C. NARCISSUS VAR. BRILLIANCE X C. CREPUSCULE A hybrid of high color. We expect that this will be a winter flowerer of good quality.	2" 2½"	3.00 4.00
S-60	C. PORTIA (C. labiata x C. Bowringiana) There has been such a steady demand for plants of C. Portia that we feel amply justified in remaking a superior strain of this old time favorite. The growth, as could be expected, is excellent. The cattleya labiata used is a selected form from a famous home raised strain of this species. The Bowringiana is of equal quality. The plants are bifoliate and will have about 12 flowers to the spray. Season—Fall.	2"	3.00
S-61	C. BOWRINGIANA, FINE VAR. X C. PORCIA CANNIZARO VAR. A.M., R.H.S. An improved C. Bowringiana would perhaps describe this cross. The growth is good and plants of this cross will appeal to those who like the small cluster cattleyas of good quality.	2"	2.00
S-67	C. ACHINE ALBA X LC. WINEMA VAR. LILLIAN STEWART Both parents of this cross have rich white sepals and petals with solid dark lips and are excellent growers. We can say with reasonable certainty that this cross will flower throughout the fall. 3" community pots, 15 to 20 plants per pot.	3" Com. Pots 2"	.75 3.00
S-70	C. MRS. F. KNOLLYS ALBA VAR. MAGNA X LC. WINEMA VAR. LILLIAN STEWART The outstanding vigor of these seedlings coupled with their fine breeding should assure a fine white with purple lip to flower throughout summer and fall. Both parents are superb varieties. 3" community pots, 10 to 20 plants per pot.	3" Com. Pots	.75
S-100	C. EDITHIAE, VERY FINE X C. BARBARA BILLINGSLEY, VERY FINE There is every reason to believe that this will be an excellent white for the midwinter season. The growth in the community pots is strong and vigorous. 3" community pots, 10 to 20 plants per pot.	3" Com. Pots	.75

No.	Parentage and Description	Pot Size	Price per Plant
16-1	<b>LC. WINDERMERE X LC. LOCARNO</b>	2"	3.00
	We expect flowers from this cross to have uniformly good shape, size, texture and color. This hybrid holds much promise as both parents were superb.	2½"	4.00
16-2	<b>C. GIGAS (Species) WARSCEWICZII</b>	2½"	3.00
	Bred from two of the finest forms of this species, we expect this strain of home grown gigas to be really of great merit. The flowers will be large and freely borne. The season will be early summer.	3"	5.00
16-3	<b>(C. Dinah, A.M., R.H.S. x Lc. Excelsior) X MOSSIAE</b>	2½"	4.00
	Dinah has a fine reputation as a parent. Lc. Excelsior being a spring bloomer with a rich lip should make this a very desirable hybrid. The growth is very good and the plants already show the C. Dinah influence in their growth habits.	3"	6.50
16-4	<b>LC. SAGANA X C. ENID</b>	3"	6.50
	This hybrid promises to be a very worthwhile producer for the spring season. The growth is strong and compact. The color will be from medium to dark rose-lavender with dark lips due to the Laelia in its breeding.		
16-5	<b>LC. GEORGE BALDWIN (C. Enid x Lc. Princess Margaret var. Stonehurst)</b>	2½"	4.00
	Few plants have a better reputation for breeding quality than has Lc. Princess Margaret, and Lc. George Baldwin is one of its best known progeny. Shape, size, color, vigor and substance are all very good. We recommend this cross highly.	3"	6.50
		4"	12.00
16-6	<b>C. TRIMOS (C. Trianae x C. Mossiae)</b>	2½"	3.00
	Year after year we have seen a block of C. Trimos bloom heavily for the Easter season. The flowers could be described as an improved C. Mossiae, having darker sepals and petals with dark Mossiae-like lips. We are offering a repeat on this cross made with carefully selected parents.	3"	5.00
16-7	<b>LC. SABINA X C. SERENITY</b>	3"	7.50
	The superb qualities of C. Serenity combined with the higher coloring and fine features of Lc. Sabina should make an excellent winter flowering hybrid. In our estimation some forms of C. Serenity have as fine a shape and substance as we have seen in a regular Cattleya hybrid. The vigor and growth habit of these seedlings is very good.	3½"	10.00
		4"	12.00
16-8	<b>C. MARION DAVIES X C. TRIANAE ALBA, BROOMHILL VAR.</b>	2½"	5.50
	We can't bring to mind any cross made with C. Trianae alba, Broomhill var., that doesn't have amazing vigor as well as fine quality. These seedlings are no exceptions. The flowers will be pure white with some yellow in the lip. The season should be winter and early spring. We think enough of this cross to raise quite a large block of it.	3"	8.00
16-9	<b>C. MEMORIA ALICE BALDWIN (C. Edithiae x C. Trentino)</b>	3"	6.50
	A pure white cattleya of exceptional substance will be characteristic of this hybrid. The growth is compact and vigorous. Many plants in three-inch pots are in sheath which is indicative of free-blooming qualities. The season is spring.	3½"	8.00

**LC. GITCHE MANITO**  
(*LC. Morvyth var. Magnifica* x *C. Gay Gordon*)

16-10	<b>C. ESTELLE ALBA X C. MINNEHAHA</b> Here is another white cross which is very promising. Both parents were carefully selected for vigor as well as flower quality. The growth on the seedlings is compact, vigorous and free-branching which seems to point toward abundant flowering. The season should be primarily spring.	3"	6.00
		3½"	7.50
		4"	10.00
16-11	<b>C. TRENTINO X C. MOSSIAE WAGENERI</b> Can be expected to be much like C. Mem. Alice Baldwin but with a later flowering period. A very fine form of C. Mossiae Wageneri was used.	3"	6.50
		3½"	8.00
		4"	10.00
16-12	<b>BLC. CONSUL GRIEG X LC. GILLIAN</b> A richly colored yellow Blc. is expected from this cross. We think very highly of both parents and regret that we have only a small stock of this hybrid to offer.	2"	3.50
16-13	<b>C. TITRIANAE X LC. WINDERMERE VAR. CLOVELY</b> Those who have seen Lc. Windermere are very keen about this cross. The growth is compact, stocky and very vigorous. The season should be winter.	3"	6.50
		4"	10.00
16-14	<b>LC. CUESTA X C. HARDYANA</b> A cross with brilliant color should be the result here. For those who like plants with vigor as well as flower quality we recommend this hybrid. The season will be summer to fall.	3"	6.00
		3½"	7.50
		4"	10.00
16-15	<b>LC. CUESTA X C. MT. ROYAL</b> Should be a happy combination. C. Mt. Royal always imparts a fine shape to its progeny; Lc. Cuesta with its distinguished reputation and breeding should prove a good parent.	3"	8.00
		4"	12.00

No. Parentage and Description		Pot Size	Price per Plant
16-16	LC. CUESTA X (Lc. Marie Dobrott x Lc. Hilary, F.C.C., R.H.S.) Large flowers of fine substance and rich coloring are what we expect from this hybrid. The growth habit of both parents is very good. They are well known for their high average flower quality. We expect the finest results from this cross.	3"	6.00
		3½"	7.50
		4"	10.00
16-17	LC. ARTHUR E. MILES (Lc. Sagana x C. Mossiae, very fine var.) This repeats a very successful cross. A large, dark, free-growing hybrid for the spring season.	3"	6.50
		4"	12.00
16-18	C. MONMOSS X LC. ALTESSE Bred from carefully selected parents, this hybrid should make a fine record for itself. The season will be winter and spring. Sepals and petals will be medium to dark rose-lavender, while the lips can be expected to have considerable color.	3"	6.00
		3½"	8.00
16-19	C. PRISCILLA ALBA X C. GIGAS, VAR. F.M. BEYRODT, F.C.C., R.H.S. Several plants of this cross have flowered at an amazingly small size. The flowers on these plants were large, of good size and quality. The sepals and petals will be white and the lips will vary from splashed crimson to solid color. The season seems to be shaping up to September and October.	2½"	4.00
		3"	6.00
		3½"	8.00
		4"	10.00
16-20	LC. CANHAMIANA ALBA (L. Purpurata, "Orchid Knoll var," x C. Mossiae Reineckiana, Young's Var.") Considered to be the best strain of Lc. Canhamiana alba made to date. We never cease to marvel over the vigor shown by plants of this cross. This is a repeat with the identical parents which were used to make the original strain.	2½"	7.50
		3"	10.00
		3½"	12.50
16-21	LC. ETHEL MERMAN (Lc. Jane Dane x Lc. Canhamiana alba) Plants of this cross which have flowered in small pots have been very promising. White sepals and petals with solid purple lips. A spring bloomer of vigor. Some plants may flower through summer and fall.	3"	6.50
		4"	12.00
16-22	C. TRIMOS ALBA (C. Trianae alba, Broomhill var. x C. Mossiae Wageneri) A strong growing free flowering white for spring are our expectations here.	2½"	4.00
		3"	7.00
		3½"	9.00
16-23	C. MOSSIAE X LC. HELEN WILMER It is expected that the Lc. Helen Wilmer will impart its color and shape to this cross. A spring bloomer of quality is hoped for.	2½"	4.00
		3"	6.50
		3½"	8.00
		4"	10.00
16-24	C. ESTELLE ALBA X C. CONCINNITY From well chosen parents this cross should give an abundance of whites throughout the winter and spring.	2½"	4.00
		3"	6.50
		4"	10.00
16-25	LC. SCOTT WILCOX (Lc. Sargon x Lc. Sam Houston) Color, size and substance are very good in this cross. The season runs from fall through spring. A cross of real merit.	3"	6.50
		4"	10.00
		4½"	12.50
		5"	15.00

No.	Parentage and Description	Pot Size	Price per Plant
16-26	LC. LOUELLA PARSONS (Lc. Jane Dane x C. Gigas, F. M. Beyrodt) A worthwhile white with purple lip for fall. Free flowering and a compact grower.	3½" 4" 4½"	8.00 10.00 12.50
16-27	C. DUPREANA (C. Warneri x C. Gigas) This is a repeat on an already well known hybrid. The season is May and June. The growth, flower quality and production of blooms will be very good. Two of the best parents were used to make this particular batch of seedlings.	2½" 3"	4.00 6.00
16-28	C. TRIANAE X BLC. MONTECITO A winter bloomer of unusual flower quality. The Blc. Montecito used had light lavender sepals and petals with a dark crimson band running down the center of the petals.	2½" 3" 4"	2.50 4.00 5.00
16-29	LC. GEORGE PATTERSON (Lc. Altesse x C. Remy Cholet) We feel this will shape up into another C. Remy Cholet hybrid of real merit. Color—medium to dark. Season—winter and spring.	3" 3½" 4" 4½" 5"	6.50 7.50 10.00 12.50 15.00
16-30	LC. FAMAGUSTA (Lc. Fame x Lc. Ivanhoe) Flowers of this variety are large, of good shape, substance and color. The season is fall to early winter. The growth is very good.	5½"	25.00
16-31	C. DIPLOMAT (C. Hivernalis x C. Remy Cholet) Strong in growth and exceedingly free flowering. The sepals and petals are light rose lavender with a darker lip. A dependable winter bloomer.	5" 5½" 6"	10.00 15.00 17.50
16-32	LC. LILY ANTHONY (C. Mossiae x C. Beatrice) A free flowering spring lavender of compact growth.	4½" 5" 5½" 6"	7.50 10.00 15.00 20.00
16-33	C. SIR PERTINAX (C. Sir Walter Scott x C. Mossiae) A very worthwhile and dependable winter bloomer. While the flowers are light they have good size and substance and are freely borne throughout the winter season.	5" 5½" 6"	15.00 20.00 25.00
16-34	C. JEVAN (C. Nebo x C. Gen. Pulteney) A compact grower and very vigorous. Flowers are of medium color and have good form and substance. Season is from October through March.	5" 5½" 6"	10.00 15.00 20.00
16-35	C. TULSA (C. Prospector x C. Trianae) A definite winter bloomer. The color is medium rose lavender while the shape and substance are very good.	5" 5½" 6" 7"	10.00 12.50 15.00 20.00
16-36	C. ACOLITA (C. Trimos x C. Tityus) We have bloomed a number of these and the average has been very high. Flowers are of good size and substance and have crimson lips with a very generous amount of yellow in the throat. The season is January on.	5" 5½" 6"	15.00 20.00 25.00

No. Parentage and Description		Pot Size	Price per Plant
16-37	LC. CALLISTOGLOSSA (C. Gigas x L. Purpurata) A good grower. The flowers are large and very richly colored. Shows the influence of the Laelia parent strongly. Lc. Callistoglossa has been used in making some of the finest present day hybrids.	5½"	15.00
16-38	LC. VIRGINIA ELLEN (Lc. Santa Claus x C. Prince Shimadzu) We think very highly of this cross. The growth is good and the flowers are large and of excellent substance and color. It is a dependable spring bloomer.	4½" 5" 5½"	15.00 20.00 25.00
16-39	C. FURNES (C. Dupreana x C. Mossiae) Compact, free flowering, medium lavender. Winter and spring.	4½" 5" 5½" 6"	10.00 12.50 15.00 20.00
16-40	LC. EDNA RICHTER (Lc. Santa Claus x C. Trianae var. Grand Monarch) Medium to dark flowers with splashed petals is characteristic of this cross. The season is late winter to spring.	4½" 5" 5½" 6"	10.00 15.00 17.50 20.00
16-41	C. RODOLPH (C. Remy Cholet x C. Warneri, Ardenholme var.) A fine hybrid of great vigor. The flowers are warm rose lavender with darker crimson lips. The season is summer and fall.	5" 5½" 6"	15.00 20.00 25.00
16-42	BC. VEITCHII (syn. Bc. Digbyano-Mossiae) Our strain of this old favorite has very good color. The flowers are warm rose lavender and of good size. The season is quite variable though summer and fall predominate.	6" 7"	25.00 30.00
16-43	LC. VENETIA (Lc. Valencia x C. Clotho) One of the most vigorous varieties we have. The flowers are large and of good color, shape and substance. We think highly of this cross.	6" 7"	30.00 35.00
16-44	C. FABIANID (C. Enid x C. Fabia) July through early fall is the main season. Flowers are dark rose lavender with darker lips veined gold. Very fragrant.	5" 5½" 6"	15.00 17.50 22.50
16-45	C. MRS. F. KNOLLYS (C. Hardyana x C. Mossiae var. Countess Grey F.C.C.) A good grower and a free bloomer. The season is variable, though mainly winter. Sepals and petals are rich rose lavender with darker lip veined gold.	5" 5½" 6"	15.00 20.00 25.00
16-46	LC. MARACAY (Lc. Hilary x C. Tityus) Flowers are warm rose lavender with richer crimson lips. The growth is very good. Season—Fall.	5½" 6" 7"	15.00 20.00 25.00
16-47	LC. SANTA CLAUS X C. FALCO Vigor and amazing production are the two outstanding characteristics of this commendable spring bloomer.	4½" 5" 5½" 6"	10.00 12.50 17.50 20.00

**C. LABI-ROYAL**  
(*C. Labiata* x *C. Mt. Royal*)

This fine flower is representative of the shape and color we expect in our hybrid *C. Mt. Royal* x *C. Fabianid*, which we offer as S-4.

16-48	<b>LC. SEAFORTH</b> ( <i>C. Intertexta</i> x <i>Lc. Locarno</i> ) A very free flowering <i>Laeliocattleya</i> of fine shape. The season is variable, though fall and early winter predominate. Sepals and petals are deep lavender to rose with rich crimson lips.	4½"	17.50
		5"	20.00
		5½"	22.50
		6"	25.00
16-49	<b>C. TRIANAE</b> ( <i>Species</i> ) Worthwhile for an amateur collection. Season is primarily from January on into spring. Light lavender.	4"	3.00
		4½"	4.00
		5"	5.00
		5½"	6.00
16-50	<b>C. CONCINNITY</b> ( <i>C. Suzanne Hye alba</i> x <i>C. Angelina</i> ) A strong growing white hybrid that is noted for its fine shape. We have used selected plants of this cross for breeding and have seedlings offered elsewhere in the catalog. The season is somewhat variable though fall predominates.	6"	7.00
		4½"	12.50
		5"	20.00
		5½"	25.00
16-51	<b>C. MT. ROYAL</b> ( <i>C. Enid</i> x <i>C. Maggie Raphael</i> ) We think very highly of <i>C. Mt. Royal</i> for two reasons, firstly because of its flower quality, which is large, dark, of excellent shape and substance. And secondly, for the fact that it passes these characteristics strongly on to its progeny. The growth is strong and the season is early summer.	4"	12.50
		5"	15.00
		6"	25.00

No. Parentage and Description		Pot Size	Price per Plant
16-52	C. LICDIN (C. Frolic x C. Dinah)	5"	15.00
	Here is a vigorous growing hybrid that produces flowers of better than average quality. The flowers are dark rose lavender with darker purple lips. The season is fall through early winter.	5½"	20.00
16-53	BLC. CRUSADER VAR. MAGNA (Blc. Queen Elizabeth x Lc. Trivanhoe)	5"	20.00
	Very large warm rose lavender flowers of fine substance. The vigor of the plants is amazing. Because of the exceptional vigor of this var. of Blc. Crusader we are able to offer flowering size divisions of this named form. Season, fall to early winter.	5½"	25.00
16-54	C. CLOTHO (C. Enid x C. Trianae)	4"	7.50
	A strong growing hybrid that produces an abundance of flowers around the Christmas season. The flowers are from medium to light purple with contrasting darker lips. Some forms of C. Clotho have exceptionally good shape.	4½"	10.00
		5"	12.50
		5½"	15.00
16-55	LC. BRACEYANA X C. COCOPA	4"	12.50
	This is a cross that is currently proving up. The growth is beyond reproach while the flower quality is proving to be very good, as was expected. The flowers are medium to dark purple with darker purple lips. The shape and substance have been very good also.	5"	20.00
16-56	LC. EL MONTE (Lc. St. Gothard x C. Monarch)	5"	17.50
	Large dark flowers with sort of a flame blush describe our plants of this cross. The growth is very strong and the season is primarily early winter though plants will sometimes flower twice a year.	7" Basket	30.00
16-57	BLC. AFTERGLOW (Bc. Thorntoni x Lc. Rover)	5"	15.00
	Plants of this cross have a very sturdy growth habit putting out leads in abundance. The rose lavender flowers are large with typical Brasso lips.	5½"	22.00
16-58	BLC. A. MERRY (Blc. British Queen x Lc. Ishtar)	5"	12.50
	A Brassolaeliocattleya that doesn't show the Brasso parent too much. The flowers are medium size, of good shape and pleasing warm purple color. The growth habit is quite compact.		
16-59	C. NARCISSUS (C. Monarch x C. Profusion)	4½"	12.50
	The rich purple flowers of this hybrid are carried on strong plants throughout the winter months.	5½"	17.50
16-60	C. ARDMORE (C. Enid x C. Mossiae)	5"	12.50
	This is the colored form of an exceptionally free flowering hybrid. The flowering period is excellent, generally always being from Easter through Mothers Day.	5½"	15.00
16-61	C. PROSPECTOR (C. Santa Monica x C. Remy Cholet)	4"	20.00
	This is by now a famous cross throughout this part of the country, and it is proving to be a worthwhile parent. The production is very heavy, the quality of flowers is fine, and the season is excellent being throughout the early winter months. The sepals and petals are warm rose lavender while the lips are dark purple. A great many of the forms have generous amounts of yellow in the lips.	4½"	22.50
		5"	25.00

No.	Parentage and Description	Pot Size	Price per Plant
16-62	<b>LC. PROSPERITY</b> (Lc. Marie Dobrott x Lc. Princess Margaret) Large dark flowers of fine shape and color. The Lc. Marie Dobrott has practically always bred hybrids with large lips of intense coloring. Lc. Princess Margaret, as a great many people know, can always be expected to breed hybrids with excellent shape. Lc. Prosperity is no exception.	5" 6"	17.50 25.00
16-63	<b>C. GREGORIO</b> (C. Van Houtte x C. Aurea) This is one of the so called Red Orchids. The flowers are very dark reddish purple. The growth is strong and compact. As is typical of hybrids of this type the flowers are very fragrant. Summer bloomer.	5" 5½"	15.00 20.00
16-64	<b>LC. QUEEN MARY</b> (C. Peetersii x Lc. Lustre) Large dark flowers of fine shape, substance and coloring. Plants of this cross sometimes flower twice a year. The plants we offer are definitely better than average. We wish to note here that there is a Cattleya Queen Mary (C. Mendelii x C. Warneri) which is inferior to and should not be confused with Lc. Queen Mary.	5½"	25.00
16-65	<b>C. CORDARY</b> (C. Dupreana x C. Altadena) Enough plants of this hybrid have flowered for us to say that we think this is a very worthwhile cross. The growth is very strong. The large dark flowers are carried in profusion on the plants from June through early fall. The flowering season has a wider spread than we mention but this is the period of peak production.	4½" 5" 5½" 6" 7"	12.50 15.00 20.00 25.00 30.00
16-66	<b>C. TAHMURATH</b> (C. Dinah, A.M., R.H.S. x C. Mossiae) As was expected, and hoped for, the Dinah parent has come out quite strong in a number of the plants we have. The flowers have warm rose lavender sepals and petals with dark purple lips. The season for us has been primarily early winter, a number having been in for Christmas and New Years.	4" 4½" 5"	12.50 15.00 17.50
16-67	<b>C. ASHLANDS</b> (C. Tityus x C. Dupreana) Warm rose lavender with darker lips strongly marked yellow. The growth is compact and the season is mainly spring though variable.	4" 4½" 5"	10.00 12.50 15.00
16-68	<b>C. FAY BAINTER</b> (C. Ella Mae Sutton x C. Bobby Jewell) A medium size white with some yellow in the lip which flowers throughout the fall and early winter months. The growth is strong and compact.	3½" 4" 4½" 5"	7.50 10.00 12.00 15.00
16-69	<b>LC. DETTA</b> (Lc. Sargon x C. Dinah, A.M., R.H.S.) Large flowers of warm rose lavender with much darker lips and with good shape. The season is fall to early winter.	7"	27.50
16-70	<b>LC. ORINOCO</b> (Lc. Fascinator x C. Luegeae) The rich yellow and dark maroon of the lips contrasts vividly with the warm rose lavender of the sepals and petals. The growth and flowering habit are good.	5" 5½"	10.00 12.50
16-71	<b>C. H. B. TURNER</b> (C. Gen. Pulteney x C. Tityus) For quality and abundance of flowers, vigor and season of bloom there are few plants more rewarding. The flowers are large and warm pinkish lavender. The lips are large of dark maroon and with generous amounts of clear yellow in the throats. The season is late fall through early winter.	7"	27.50

### C. TETHYS VAR. TANAH

(C. Annie J. Lines x C. Ardentissima var. Colossal)

In just a few years this cross has become famous as a hybrid with large, dark, reddish purple flowers. We show here one of the varieties we have in stock.

16-72	C. COWANIAE ALBA (C. Mossiae Wageneri x C. Intertexta alba)	4"	12.50
		4½"	15.00
	A free flowering white, with some yellow in the lip, for late May and well into June pretty well sums this cross up. Though this cross can't be expected to win prizes it will prove very profitable either in pleasure to the amateur, or for cut flowers at a highly desirable season to the commercial grower.	5"	17.50
16-73	LC. NINIAN (Lc. Cynthia x Lc. Rudgwick)	5"	15.00
	The flowers on this cross are very unusual, being a very light lavender with a faint peach blush. The lips are darker lavender.		
16-74	C. ENID (C. Gigas x C. Mossiae)	4"	7.50
		5"	12.00
	We have three strains of C. Enid in our stock. Each one of them has certain desirable characteristics. All of them are very worthwhile. The flowers are large, of good color and freely borne. The plants are vigorous and flower twice and sometimes three times a year.	5½"	15.00
		6"	20.00
		7"	25.00-30.00
16-75	BC. LOIS (C. Triumphans x Bc. Leemanae)	5"	25.00
	This is a much sought after cross. The growth is very strong and the flowers are large and of unusual coloring. The basic colors can be said to be shades of light yellow overlaid with bronze and light lavender. The lips are large, fringed and heavily veined old gold.	6"	35.00

No.	Parentage and Description	Pot Size	Price per Plant
16-76	<b>LC. ARCHDEACON</b> (Lc. Princess Margaret x C. Hardyana) Large flowers, high color, good shape and a June bloomer certainly qualify this variety as being highly desirable. The growth is also very strong.	6"	35.00
16-77	<b>C. REMY CHOLET</b> (C. Trianae var. Imperator x C. Monarch) This hybrid flowers around Christmas. The production is heavy. The sepals and petals are medium lavender while the lips, as could be expected, are very dark.	5" 6"	15.00 22.50
16-78	<b>C. J. A. CARBONE</b> (C. Prospector x C. Mossiae) Plants we have seen flower from this cross seem to have favored the Prospector parent. The growth is strong, the flower quality good, and the season so far has been around March and April.	4" 5"	10.00 15.00
16-79	<b>C. ANNETTE VAR. PRINCESS MARY X LC. JANE DANE</b> We have not seen any plants flower from this cross but we have every confidence that it will be a very worthwhile white with purple lip. The season will probably be fall.	3½" 4"	8.00 10.00
16-80	<b>C. JAVOTTE</b> (C. Edithiae x C. Lady Veitch) A free flowering fall blooming white has been the result here. Some forms of this cross have been very worthwhile.	4" 5"	10.00 15.00
16-81	<b>BC. THORNTONII</b> (B. Digbyano x C. Gaskelliana) The delicate coloring in flowers of this cross are admired by many. The sepals and petals are very delicate light rose lavender while the lips are almost the same color with the exception of a tiny spot of dark lavender in their center.	5"	12.50
16-82	<b>C. OCEANID</b> (C. Nebo x C. Trimos) An abundance of blooms for early spring. The growth is strong and compact while the flowers can be classed as an improvement over the well known cross, C. Nebo.	4½" 5" 5½"	15.00 17.50 20.00
16-83	<b>C. DUPREANA X C. GULLIO</b> As this copy is written we are pleased with the fact that this cross is shaping up according to our hopes. The season will be primarily May and June and the quality will be good. The quantity — abundant.	4" 4½" 5"	12.00 12.50 15.00
16-84	<b>C. TRIUMPHANS</b> (C. Dowiana x C. Rex) Here is a strong growing yellow that flowers freely and does not come deformed. As most experienced orchid growers will agree most yellows are disappointing. This cross, while not outstanding, produces medium size light yellow flowers with crimson lips veined gold in July and August.	5"	15.00
16-85	<b>LC. VISALIA</b> (Lc. Bogota x Lc. Asbury) We have flowered all the plants we have of this cross and can say that not a one has been less than average to very good. The C. Trianae var. Imperator shows in the dark lips of these plants, while the Lc. Sargon in their breeding also helps to make this an outstanding hybrid. The season is late fall through early winter. The vigor of the plants is excellent.	5" 5½" 6"	22.00 25.00 30.00

No.	Parentage and Description	Pot Size	Price per Plant
16-86	C. BANDIT (C. Tityus x C. Nebo) Good quality flowers and amazingly free flowering at a fine time of the year. The season is early winter. The flowers are warm rose lavender and the lips, as could be expected, are dark purple with rich yellow markings.	4½" 5" 5½"	15.00 17.00 20.00
16-87	C. ESTELLE ALBA (C. Cowaniae var. Enchantress x C. Edithiae) This fine white is very well known by now. The growth is very compact and the production leaves little to be desired. We offer flowering size divisions from our stock of selected forms of this hybrid. The season is quite extended though its peak production is early May, around Mothers Day.	4" 4½" 5" 5½" 6"	15.00 17.50 20.00 25.00 30.00
16-88	LC. TALLADEGA (Lc. Mrs. H. Lloyd x C. Gen. Pulteney) A strong grower that flowers very nicely around Christmas. The flowers are light lavender with contrastingly darker purple lips.	5" 5½" 6"	10.00 12.50 15.00
16-89	C. BENEVOLENCE (C. Achine alba x C. Hardyana alba) Amazingly free flowering. Flowers are creamy white with solid crimson lips. The season is late fall to early winter.	4" 5" 6"	12.00 15.00 25.00
16-90	C. SUZANNE HYE ALBA (C. Mossiae Wageneri x C. Gaskelliana alba) A medium sized white with a very compact growth habit that flowers in the early spring.	5"	15.00
16-91	(Lc. Aureole x C. Robert H. Jewell) x C. Dowiana We have flowered a number of plants of this cross and have been very pleased. The flowers are about four inches across, solid clear rich yellow. The lips are of the same color but several shades darker. We have had many offers to buy plants of this hybrid and are now offering a limited number.	Flowering Size Selected Forms	10.00 20.00 up
16-92	C. HEYDAY (C. Prospector x C. Profusion) Medium to dark flowers, compact growth habit, and flowering throughout the desirable early spring months makes this a commendable variety.	4" 4½" 5"	12.50 15.00 20.00
16-93	C. CONSUMMATION (C. Tityus var. Pearl x C. Dinah, A.M., R.H.S.) Flowers have fine shape and substance and the growth is strong and compact. The color is medium rose lavender.	5½" 6"	20.00 25.00
16-94	LC. OPHIR (C. Dowiana x L. Xanthina) This might be classed at a novelty cross. The flowers are small, about 2", from medium to light yellow, with almost solid yellow lips.	4"	10.00
16-95	BLC. JANETTA (Blc. Heather Queen x Lc. Marie Dobrott) Plants we offer of this cross are strong growers with flowers of very good quality. The sepals and petals are medium to dark lavender with excellent substance and texture. The lips are intense dark purple.	5" 6" 7"	15.00 20.00 25.00
16-96	C. KING GEORGE (C. Dowiana-aurea x C. Triumphans) This is a strong growing yellow that does not have deformed flowers. The sepals and petals are medium to dark yellow while the lips are very dark crimson heavily veined gold.	5" 5½"	22.00 25.00

### *DENDROBIUM MERLIN*

This easily grown Dendrobium hybrid is always a welcome addition to a collection.

16-97	LC. NEFERTARI (C. Mt. Royal alba x Lc. British Queen alba) An unbelievably strong grower. The sepals and petals are white while the lips are purple. The season is primarily late fall.	6"	20.00
16-98	LC. HASSALLII ALBA (Lc. Britannia alba x C. Gigas, var. FM3) This cross is an extremely free flowering white with solid purple lip. The season is primarily late spring though we have flowered some around the Christmas season.	5" 5½"	17.00 22.00
16-99	C. CADES (C. Angelina x C. Lady Veitch) A very compact growing pure white for winter.	4½" 5"	12.50 15.00
16-100	SLC. ACHERON (Slc. Meuse x Lc. Theniss) The intensity of coloring in the lip and the unusual lavender in the sepals and petals show that this hybrid is an Slc. The growth is very strong and the flowers are large for an Slc.	5½"	20.00
16-101	C. TAMBORA (C. Intertexta var. Juliettae x C. R. Prowe) Here is a sturdy white for the early spring season. The flowers are small and of heavy texture.	4" 5"	7.50 12.00
16-102	C. THETIS (C. Delphin x C. Titrianae) Warm rose lavender flower with heavily frilled dark lip. Winter.	5½"	15.00

#### **C. MOSSIAE WAGENERI**

Can't be beat as a producer of good quality whites for that ever important month of June. We offer this under No. S-27.

#### **PHALAENOPSIS SCHILLERIANA (Species)**

Delicate pink flowers of from 1½ to 2 inches across. The fragrant flowers are freely borne in sprays. These plants are extremely ornamental even when they are not in flower, having dark green strap-like leaves that are banded and splashed with a lighter silvery green.

Mature plants in 6" baskets. Leaves from 8-12 inches. 7.50, 10.00, 12.50

#### **CYPRIPEDIUMS**

We have an excellent collection of fine hybrid Cypripediums available to those who are interested in plants of this genus. They are among the easiest and most worthwhile of all orchids to grow. Keep them cool, do not let them dry out at the roots and they will reward the grower amply and faithfully throughout each winter. The price for flowering size plants of this genus ranges from 7.50 to 20.00, on the average. Some plants, of course, run higher. Because in most cases we have only several plants of each variety to offer, the picture is constantly changing. We suggest a visit to the nursery or a request for a special offering.

#### **DIVISIONS FROM FLOWERING STOCK**

A great many sales at the nursery are for divisions from plants that people have admired in bloom. This is regarded by many as an excellent way to build up a collection to meet the personal taste, with a minimum of speculation as to the appearance and quality of the flowers. We recommend this method to those who are not already familiar with it.

**C. TETHYS (C Annie J. Lines x C. Ardentissima)**

This cross has averaged very dark in color and of all around excellent quality. We have a good stock of plants from which we have taken divisions. Divisions from flowered plants are available to those who are desirous of obtaining this cross. The price is determined by the quality of flower and size of plant.....From \$20.00 up

**C. CORFLAMBO (C. Ardentissima x C. Jicarillo)**

We consider this the companion cross to the above in as much as they both have the same parent in common. Many exceptionally large dark forms have come from this cross also. ....From \$10.00 up

**DENDROBIUMS**

Members of this large genus of East Indian orchids are extremely easy to grow. They do well in the intermediate house with the cattleyas and will flower freely. Depending on the species they flower from early spring throughout the summer and fall. We offer various size plants of the following species and hybrids.

**D. MERLIN (Nobile x Queen of Gatton)**

A sturdy grower having canes up to 3'. The flowers are from 2½" to 3" across. Rose lavender brushed darker on the tips of the petals. The lips are very pretty dark purple. Flowers are borne in two and threes up and down the stem. A mature plant can have dozens of flowers out at a time. Flowers last on the plants for weeks. Flowering size to flower in the next season ..... \$7.50

**DEN. NOBILE (species)**

The species from which a great many fine hybrids are derived is similar to its hybrid, Merlin, but smaller. Flowers about 2-2½". Flowering size to flower in the next season.....\$6.00

**DEN. MOSCHATUM VAR. CALCEOLARIA (species, India)**

Truly a fascinating thing to see in bloom. The plants have stems to 4 or 5 feet in length. The flowers borne in racemes from the ends of the stems are an orange yellow, tinged rose. The light yellow lip is pouch shaped. Summer is the blooming period. Plants to flower in about 12 months .....\$5.00

**DENDROBIUM PHALAENOPSIS**

Seedlings bred from selected parents are offered. The plants grow to 2' and have flowers from medium to dark rose in sprays coming from the ends of the stems. The season is summer. Flowering size plants.....\$7.50

## CONDITIONS OF SALE

1. Orders will be filled in rotation. All items listed are subject to prior sale.
2. We reserve the right to limit quantities sold.
3. No substitutions will be made on any order either as to size or variety without authorization.
4. We do NOT make a packing charge.
5. Unless otherwise advised, shipment will be made via Railway Express, charges collect. (All orders are f.o.b., San Gabriel.) However, we recommend Air Express (or Air Freight on large orders) for shipments destined for countries outside of the United States and for shipments to be made during the winter months when there might be danger of the plants freezing en route.
6. Claims for damaged shipments must be filed immediately with the carrier by the consignee. We make every effort to pack carefully, and our responsibility ends when the shipment is accepted by the carrier.
7. On the authority of your local Plant Quarantine Station, please advise us if there are any unusual requirements pertaining to the shipment of plants into your territory or country.
8. Our firm has been properly authorized to handle shipments to Hawaii. However, the customer must forward with his order his Permit Number which he must obtain from the Board of Commissioners of Agriculture and Forestry, Honolulu.
9. Unless your credit has been established with us, kindly enclose check, money order, or bank draft to cover payment of your order in full.
10. Please list a second choice in the event that varieties you have selected are sold out.
11. California purchasers add 3% state sales tax.
12. Prices subject to change without notice.
